

GAMIFYING THE TOKEN MINING EXPERIENCE WORLDWIDE

The TQ Token by TokenQuest

What We Do

TokenQuest gamifies the token mining experience through an interactive mobile app, minimizing power costs associated with mining, and turning mining into a global mobile phone cryptohunt adventure, utilizing the blockchain for in-app shopping purchases with corresponding stores who support the TQ Token, and donation ledgers to Green Organizations that TokenQuest helps facilitate charitable transactions through.

Problem

Bitcoin is now on pace to use just over 42TWh of electricity in a year, placing it ahead of New Zealand and Hungary and just behind Peru, according to estimates from Digiconomist.Net

"If it keeps increasing at this rate, Bitcoin mining will consume the entire world's electricity by February 2020" - Power Compare Reports.

Solution

Our vision, from the beginning, has been to protect our Earth by staying "green", removing the need for token discovery via high electrical consumption rates, and in the same process make mining irresistibly fun, exciting, and feasible for the non-technical consumer. Instead of using expensive, energy-consuming computers to mine coins, the TQ (TokenQuest) mobile app will bring the coins to you! All that is required is an Android/iPhone, and a sense of adventure and curiosity!

Mining Disruption

TQ Coins may spawn in oceans, deep within the Serengeti, or in the streets of New York City. Two new TQ Coins spawn globally for each single TQ coin discovered. Coins not discovered within one hour are "teleported" to new, random locations.

TokenQuest will revolutionize the Crypto-Currency industry in many ways: Mining will be replaced by passive treasure hunting within the TQ phone app, which acts as a virtual metal detector.

Search. Discover. Spend.

TQTV, a live-streaming network of Advertiser's commercial messages, will be cemented within the TQ app, giving Advertisers significant exposure, and thus motivation to accept TQ coins as currency.

A True Utility Token In Every Sense

Unlike most ICOs which claim to be producing tokens which are SEC exempt as securities, but actually ARE securities, TQ Tokens are tokens in the truest sense of the word. Users go from token discovery immediately into the TQ Shopping Mall to spend their bounty, or donate portions to their favorite Green organization, if they wish, making it a utility coin with a fun yet powerful purpose.

Progress

TokenQuest is a threshold idea out of the gate with a 40-page whitepaper explaining in detail how the complete application will work on every level. Several investors have come forward expressing interest immediately, and the company seeks to solidify its foundation with further funding, as well as significant and relevant Advisors to help their vision become a reality.
